About **AISIN Europe Aftermarket**

AISIN Europe is the European subsidiary of the Japanese group **AISIN**, a global leader in the manufacturing of original equipment (OE) and aftermarket automotive parts. Headquartered in Braine-l'Alleud, Belgium, AISIN Europe operates several production sites across the continent.

The **Mons plant** specializes in the production of **electronic components, transmission remanufacturing, and spare parts distribution**, serving major automotive clients.

In the **aftermarket sector**, AISIN Europe offers a **wide range of high-quality products**, covering systems such as **clutch, cooling, transmission, engine, and braking**. The company focuses on innovation and precision in the design of its products, leveraging advanced **engineering and production techniques**. Its **main warehouse** stocks more than **500,000 products**, covering **13,000 different references**.

Recognized as a **'Factory of the Future'** for its ability to adapt to evolving market demands, AISIN Europe continues to innovate and optimize its operations to meet industry challenges.

AISIN Remanufacturing

A Sustainable and High-Performance Solution for the Aftermarket

In a context where sustainability and resource optimization are becoming increasingly important, **AISIN Europe** stands out as a key player in **remanufacturing** within the automotive aftermarket. With its cutting-edge expertise and commitment to the circular economy, AISIN provides high-performance and environmentally friendly replacement solutions.

What is Remanufacturing?

Remanufacturing involves recovering, disassembling, cleaning, inspecting and reassembling used automotive parts to give them a second life. Unlike simple recycling or repair, this process ensures performance equivalent to new parts while reducing carbon footprint and raw material consumption.

AISIN's Expertise in Remanufacturing

AISIN Europe applies rigorous standards at every stage of the remanufacturing process. At its **Mons (Belgium)** site, the company remanufactures **automatic transmissions**, a crucial component for many modern vehicles. Each part undergoes strict quality controls and benefits from the most advanced technologies to ensure maximum reliability.
